INDEX.

Abbeys, ruined, 461.
Abraiamain, or pearl divers, 418.
Acetic acid, a product of vinous fermentation, 247.
Acetification, M. Blondeau on, 468.
Acids, their influence on fermentation, 379.
Acrocarpi, an order of mosses, 43, 355.
Aërolites, 159.
Africa, explorations in, 46; snowy mountain peaks in, 385.
African lakes, ancient knowledge of, 464.
Agaricus, species of, 268, 279.
Ailsa Craig and its birds, 114.
Air not necessary for putrefaction, 102.
Air, stratification of, 31.
Albertite at Mountgerald, 145.
Alcyonia digitata, or dead men's fingers, 11.
Alexander Jannæus, coins of, 336.
Alexandra, coins of, 336.
Algæ and fungi, distinct classes, 238.
Allotropy, 28.
Almond oil, its effect upon camphor, 19.
Ammonites, or ram's horns, 229.
Amœbæ, Dr. Wallich on the, 388.
Amœbæ, princeps and villosa, 67.
Amœban rhizopods, the, 466.
Anacharis alsinastrum, ophrydium attached to, 25.
Ananchytes, or fairy loaves, 229.
Anagallis tenella, bog pimpernel, 275.
Anatomy of Chimpanzee, 225.
Andes, M. Pissis on the, 180.
Anemones found at Llandudno, 10.
Animalcules in melon, 379.
Animal matter in coal, 317.
Animals, useful qualities of, 215.
Anthea cereus, stinging powers of, 156.
Antigonus, coins issued by, 337.
Antiochus IV., tyranny of, 333.
Apargia hispida, the rough hawk-bit, 268.
Aplysia hybrida (sea hare), 85.
Arboricula rufogularis (tree partridge), 196.
Arc of the meridian, measurement of, 463.
Aristobulus, coins of, 336.
Arithmetical recreations, 353.
Artemia salina, crystals in, 94.
Arterial system of slug, 110.
Artificial tongue, 466.
Ascarides in unfiltered water, 390.
Ascaris lumbricoides, 462.
Asmonæan dynasty, origin of the, 334.
Asphaltes, 88.
Assyria, cuneatic records of, 328.
Asterias aurantiaca described, 254.
Asthma, electricity of, 466.
Astronomical telescopes, new stand for, 282.
Astronomy.—Clusters of stars and nebulæ, 56; the surface of the moon, 62; falling stars and meteorites, 157; the planet Mars, a fragment, 182; double stars, 193; comets, 218; clusters and nebulæ, 257; occultations, 266; on the method of observing variable stars, 303; new planet, 79th, 307; clusters, nebulæ, and occultations, 346; comets whose orbits have not been calculated, 381; clusters and nebulæ, occultations, the achromatic telescope, 448.
Atmolyser, uses of the, 416.
Atmolysis, 227, 414.
Atmospheric changes, causes of, 301.
Atmospheric currents and shooting stars, 466.
Atoms, elasticity of gaseous, 415.
Augustus, treasures bequeathed to, 338.
Aymestrey rock, 402.
Azulene, 467.

Babinet on the lunar eclipse, 147.
Bacterium, a genus of infusoria, 177; B. termo, 101; B. termo and vibrio lineola the same animal, 378.
Bacteriums and typhoid fever, 467.
Bacteriums in vinegar plant, 244.
Bahrein, pearl fishery of, 418.
Ballota nigra (black horehound), Coleophora on, 6.
Barcocebas, silver coins issued by, 343.
Basalt of Pouk Hill, 98.
Battle stone at Hope Bowdler Hill, 400.
Bayer's work on ancient money, 238.
"Becket," disasters on board the, 80.

Bees, hermaphrodite, 388.
Behistun, inscription of, 328.
Belemnites, or thunderbolts, 229.
Belladonna, effects of, 306.
Big cañon on the Colorado River, 310.
Bilharzia hæmatobia, 462.
Birds of Ailsa Craig, 114.
Birds of Sikkim, 196.
Bitumens, native, 88.
Black cañon of the Colorado River, 312.
Blackcock in Lapland, 375.
Black Mountains, view from the, 316.
Blondeau on acetification, 468.
Blood, bacteriums in the, 177; causes of coagulation of, 227; corpuscles, structure of, 68; important duties of, 105; of slug, colourless, 111.
Blue cyanea, the, 149.
Blue Nile, source of the, 47.
Boletus, species of, described, 270.
Bolides at Rhodes and dust shower, 228.
Bolitos, 159.
Botanizing at Oakshott Heath, 266.
Botany.—Vaccinium vitis idæa, food for Coleophora, 5; Larch, food for tent-maker caterpillars, 5; Luzula, Coleophora in seeds of, 6; Nostoc pruniforme, botanic name of Ophrydium versatile, 25; the study of mosses, 42; Cinchona bark from India, 65; Santalaceæ, 75; the Phascums, or earth mosses, 173; Minute structure of the vinegar plant, 238; the Dicranums, or fork-mosses, 248; botanizing at Oakshott Heath, 266.
Bothriocephalus, species of, 462.
Bouquet of wine, 228.
Brain of Bushwoman, and brains of idiots, 387.
Branchipus eximiis described, 217.
Brass cells for mounting objects, 370.
Bread from Pompeii, 226.
British Association, 222, 303.
British fishes, history of, 301.
British Meteorological Society.—Meteorological disturbances during the storm of October, 30, 1863, 386.
British star-fishes, 251.
Bromine, preparation of, 304.
Bruce, discoveries of, 47.
Brutes, moral faculties of, 211.
Bugula found at Llandudno, 12.
Burton's, Captain, discoveries, 46.
Bushwoman, brain of, 387.

Caer Caradoc described, 397.
Caloric engines, 417.
Camphor pulsations, 17.
Cañons of the Colorado River, 309.
Capillary transpiration of gases, 416.
Caradoc Club, 396.
Carbon, an allotropic substance, 28.
Carbonic acid, diffusive powers of, 415.
Cardinas, Captain, travels of, 310.
Castle, ruined, 461.
Caterpillars, leaf-mining, 1.
Cattle breeding, novelty in, 306.
Cattle, number in Iceland and Denmark, 391.
Cells, the functions of, 42.
Cerasus lauro cerasus eaten by goats, 304.
Cerebral development of animals, 214.
Ceriornis Satyra (Horned Tragopan), 69, 195.
Ceylon pearl fisheries. 418.
Ceylon, Weddos or Widdos of, 464.
Chanks preying upon oysters, 420.
Chemical Society.—Synthesis, 65; a curious case of electrolytic action, 144; vanadium in English pig-iron, 386.
Chilian mountain system, 181.
Chimpanzee, anatomy of, 225.
Chlorine in animals, 304.
Chrysanthemum parthenium, 268.
Chrysaora, stinging powers of, 156.
Church Stretton, description of, 396.
Cidaris, spines of, 229.
Cinchona bark from India, 65.
Circulation of Coleophora, 3; of slug, 105; organs of, described, 137.
Cirrhigrade star-fishes described, 254.
Cladocarpi, an artificial group of mosses, 43, 355.
Clay, vanadic acid in, 432.
Clays, formation of, 410.
Cnidæ of Medusæ described, 156.
Coal, depth of workings, 320; fields, points of chief importance in, 318; mines, exhaustion of, 222; supply and waste of, 317; seams, number and thickness of, 319; waste of in households, 223; supply, further note on the, 438.
Coast line of the Lothians, elevation of, 305.
Coinages of Judæa, 328, 442.
Coleophora, or tent-makers, 1.
Coleophora vitella making its case, 5.
Colne oyster fishery, 424.
Colorado River, cañons of the, 309.
Colour, moonlight and, 127.
Columnar basalt of Pouk Hill, Staffordshire, 98.
Comatula, British star-fish, 251.
Comet V., 1863, 388.
Comets whose orbits are not calculated, 218, 381.
Compressorium, a new reversible, 370; Ross's new, 227.

Coney of Scripture, 139.
Consanguineous marriages, effects of, 466.
Constitutional powers of animals, 304.
Contractile filaments of the thistle tribe, 146.
Copponius, coinage issued by, 338.
Coprinus atramentarius (fungus), 279.
Corals of Jamaica, 65.
Corpuscules, structure of blood, 68.
Cossus, preparation of, by Mr. Robertson, 3.
Cotswold Field Club, 395.
Crassus, plunder of the Temple by, 337.
Crystalline quartz, of water origin, 409.
Crystals in the intestines of Artemia salina, 94.
Cumene in photogenic oils, 91.
Cuneatic records of Assyria, 328.
Cuscuta Europæa, the great dodder, 274.
Cynæa, a genus established by Peron, 150.
Cypris cettica and other entomostraca, 217.
Cysticerci, or measles of pigs, 390.

Dædalea quercinus, 270.
Daphnia Atkinsoni, and other entomostraca, 217.
Darius, first deciphering the name of, 328.
Dead sea water, use of, 307.
Deaths, number of, in Iceland, 392.
Deities, functions of, 73.
Denmark, number of cattle in, 391.
Desk-book of English Synonymes, 459.
Dialysis, 414.
Dialysis, Professor Graham's researches into, 247.
Dicranums, or fork-mosses, 248.
Dictionary of Natural History Terms, 458.
Diffusiometer, 414.
Diptera, the order, 439.
Disease generated by infusoria, 177.
Distoma heterophyes, 462.
Dodder, does it root in the earth? 272.
Dog, reason of the, 212; entozoons in the, 393.
Doris tuberculata, sea slug, 10.
Drosera rotundifolia, the sun-dew, 273.
Dry mounting for microscopic objects, 307, 370.
Dry processes in photography, 302.
Dudley Club, 396.
Dust shower at Rhodes, 228.

Ear, functions of the, 147.
Earth magnetism, 406.
Earth mosses (Phascums), 173.
Earthquake catalogue, 297.
Earthquake of October, 1863, 294, 367.
Earthquakes, the philosophy of, 358.
Earthquakes at Rhodes, 227.
Earth's permanence, the result of forces, 359.
East Indies, sandal wood in the, 78.
Echinococcus, natural history of, 390.
Edward I., cognomen of, 334.
Eel, how to obtain scales of the, 428.
Eggs, number of, in oysters, 425.
Egypt, cause of floods in, 46.
Electrical researches, by De la Rive and Gassiot, 31.
Electricity and asthma, 466.
Electrolytic action, curious case of, 144.
Encrinite stems, 229.
England's Workshops, 460.
English Synonymes, Desk-book of, 459.
English lakes, our, 460.
Engraving, new process of, 148.
Entomological Society. — Hermaphodite form of papilio, 145; destructive habits of larvæ of Noctua segetum, 305.
Entomostraca from Gihon, 217.
Entozoa in domesticated animals, 391.
Entozoology, recent discoveries in, 389.
Equisetum telmateia, 277.
Erica, species of, 275.
Eromanga, sandal wood of, 80.
Estheria Gihoni, described, 217.
Ethnological Society.—The Weddos, or Widdos of Ceylon, 464.
Expedition of four Dutch ladies, 51.
Eye, refactive power of the, 224.
Eye-pieces, use of low powers with deep, 169.

Fecundation of plants, artificial, 306.
Fern spores compared with moss, 43.
Fertilization of ferns and mosses, 44.
Festuca ovina, 274.
Field-clubs, a day with the, 395.
Fire-balls, 159.
Fishes of the British Islands, history of the, 301.
Fissidens (moss), 248, 335.
Flora and Fauna of the Malay Archipelago, 66.
Flora of Marlborough, 458.
Flora of Surrey, 458.
Fluorine, a powerful poison, 304.
Fork-mosses, 248, 355.
Formosa, geography of, 465.
Fossils of the Silurian system, 398.
Fucus serratus, animals found on, 86.
Fucus vesiculosus, bladder-weed, 11.
Fungi and algæ, distinct classes, 238.

Gallus ferrugineus (jungle fowl), 196.

Gangrene quite different from putrefaction, 104.
Gassiot spectroscope, 67.
Gaza, taking of, 320.
Generation, spontaneous, 466.
GEOGRAPHICAL SOCIETY. — On the flora and fauna of the Malay Archipelago, 66; discovery of snowy mountain peaks in Tropical Africa, by Baron Von Decken, 385; geography of Formosa, 465.
Geological history of coal, 317.
GEOLOGICAL SOCIETY.—On the tertiary shells and corals of Jamaica, 65; on the occurrence of albertite at Mount-Gerald, Scotland, 145; on some ichthyolites from New South Wales, 384.
Geology of the Nile Valley, north of the second cataract, 384.
Geology, metamorphism, 403.
Germination, infusoria and, 308.
Gifford's injector, 224.
Gihon, entomostraca from, 217.
Gill feet of brine shrimps, 95.
Glaisher's, Mr., ascents, 67.
Goniaster equestris, (the sea pincushion), 253.
Government monopolies, 421.
Granite, formation of, 410.
Grant's, Captain, discoveries, 46.
Great cañons of the Colorado River, 309.
Great Orme's Head, 8.
Greek Zeus, statue of, 333.
Green, an innocent, 148.
Greenstone, formation of, 410.
Griffith's Cuvier, singular error in, 136.
Grouse, the new British, 197.
Gryphæa, or Devil's toe-nails, 229.
Gulls, species of, on Ailsa Craig, 122.
Gun-cotton, advantages of, 463.
Gunpowder, advantages of, in warfare, 463.
Gutta-percha cells for mounting objects, 370.

HABIT in species, change of, 388.
Hadrian, Jewish coins of the reign of, 328.
Heart, muscles of the, 147.
Heat, dynamical theory of, 223; radiant, 223.
Heath coleophora, tent of, 6.
Helmintholegists, continental, 389.
Hermaphrodite bees, 388.
Hermaphrodite form of papilio, 145.
Herod Agrippa, coins issued by, 339.
Herod Antipas, coins issued by, 339.
Herod the Great, coins of, 337.
Hieracium pilosella, 268.
Hippobosca, or horse-fly, 439.
Hippopotamus, molars of a large, 385.
Hope Bowdler Hill, 400.
Horned pheasant, notes on the, 195.
Hull to Happaranda by steam, 374.
Hydatids, or watery cysts, 389.
Hydro-carbons suspended in oil, 93.
Hydrocotyle vulgaris, 277.
Hydrogen, diffusibility of, 415.
Hydropathy, practical, 460.
Hypericum elodes, flowers open only in sunshine, 279.
Hyrax, the, of Syria, 134.
Hyrcanus II., coins of, 336.

ICELAND, horned cattle in, 391.
Ichthyolites from New South Wales, 384.
Ichthyology of Nova Scotia, 460.
Idiots, brains of, 387.
India, Cinchona bark from, 65.
Indian fibre-producing plants, 436.
Infrascata, Hill of, 326.
Infusoria, classification of, 25; instinct in, 67; and germination, 308; disease generated by, 177.
Instinct, reason and, 211.
Intestines of cossus, muscles in, 3.
Iodized sulphur, elasticity of, 30.
Iron pyrites, 229.
Issus, battle of, 329.

JAMAICA, shells and corals of, 65.
Jerusalem, coinages of, 328, 442.
Jewish shekels, the first, 328, 442.
John Hyrcanus, coins of, 335.
Jonathan, King of Judæa, assassination of, 335.
Judæa, coinages of, 328, 442.
Judas Maccabæus, coins attributed to, 331.
Julus milipede refused by moles for food, 23.
Juncus squarrosus, 274; uliginosus, 277.
Jupiter, statue of, in the Jewish temple, 333.

KARSTEN on organic cells, 146.
Kirchhoff on sun-spots, 467.
Kullikoy (an avicula) an enemy to oysters, 420.

LACUNA pallidula, 86.
Lakes, ancient knowledge of African, 464.
Lakes, our English, 460
Lamb, Jewish shekel, the value of a, 330.
Laminaria digitata, 85.
Lamium purpurea (purple dead-nettle), coleophora on, 6.

Lamna, teeth of, 229.
Lapilli ejected from Vesuvius, 327.
Lapland, a visit to, 373.
Larvæ of coleoptera, habits of, 1.
Lastrea oreopteris (fern), 277.
Leaves, food in the cells of, 4.
Lemmings, migration of, 377.
Lenses, material for photographic, 228.
Leotia lubrica, 270.
Lepidodendron, dragon's skin, 229.
Lightning, subdivided, 387.
Light, its relation to the deposit of crystals, 20.
Limestones, formation of, 409.
Limosipennella feeding on elm, 2; resources of, 5.
Linnæan Society.—Cinchona bark from India, 65.
Lionel Beale on nerve cells, 148.
Lithocolletis compared with coleophora, 1.
Lithographs, reproduction of, 148.
Little Orme's Head, 8.
Llandudno, a visit to, 8.
London clay, vanadic acid in, 433.
Lothians, elevation of coast line, 305.
Lotus corniculatus, coleophora feeding on, 6.
Low powers with deep eye-pieces, use of, 169.
Luidia fragilissima described, 254.
Lunar eclipse, Babinet on the, 147.
Lung-sacs of slug, 106.
Luzula, coleophora in seeds of, 6.
Lycopodium inundatum, 275.
Lycopodium powder, used to shew currents of camphor, 19.
Lyonnet's researches, illustrated, 3.
Lysimachia nummularia, 279.

Maabar, pearls found at, 418.
Maccabæan dynasty, coinages of the, 333.
Machpelah, price of the field of, 330.
Maize plant, utilization of the, 436.
Malay Archipelago, flora and fauna of, 66.
Malleus scotorum, origin of the name, 334.
Malvern Field Club, 396.
Marcet on nocturnal radiation, 142.
Marine phosphorescence, novel case, 308.
Marlborough flora, 458.
Marriages, effects of consanguineous, 466.
Mars, the planet, a fragment, 182.
Measles administered to condemned criminals, 390.
Medical science, bearing of scientific researches upon, 303.
Medusæ, interest of the, 149.
Medusa, examination of marginal organs by Ehrenberg, 154.
Meleagrina margaritifera (pearl oyster), 422.
Melon, putrefaction of, 379.
Melophagus, the, or sheep tick, 439.
Membranipora pilosa, examination of, 12.
Metal, new, 307.
Metalloids, manual of the, 457.
Metamorphism, 403.
Meteorites, 156.
Meteors, the August, 226.
Meteorological disturbances during the storm of Oct. 30, 1863, 386.
Meteorological observations at Kew, 36, 296.
Methide of mercury, formation of, 387.
Micro-lepidoptera, 1.
Microphytes in melon, 379.
Microscope Teachings, 426; objects, dry mounting for, 307, 370; low powers with deep eye-pieces, 169; sunlight illumination for the, 307.
Microzoaries, loose employment of the term, 380.
Miniature, new kind of, 292.
Mining caterpillars, 5.
Mirage in the Gulf of California, 310.
Mojave Mountains, 311.
Molars of a large hippopotamus, 385.
Mole, notes on the, 21.
Monas crepusculum, small infusoria, 101, 239.
Monument Mountains on the Colorado River, 310.
Monuments, ancient, 328.
Moon, thunderstorms and the, 306.
Moonal, the purple, in Sikkim, 106.
Moonlight and colour, 127.
Moral faculties of brutes, 211.
Mormon fratercula (puffin), 116.
Mosses, phascums or earth, 173; the dicranums, or fork, 248; the flat fork, 355; the study of, 42.
Motive power, new, 223.
Mountains of the Moon, 47; of Chili, 181; our English, 460.
Mounting dry objects, 370.
Muscles of cossus, 3.
Muscles of the heart, 147.
Mycoderm of wine, 246.
Myosotis palustris, 277.
Myrtaceæ classed with santalaceæ, 75.

Naples, view of Vesuvius from, 326.
Narthecium ossifragum, bog aspodel, 275.
Natterjack, notes on the natural history of the, 123.
Natterjack, the, in Lancashire, 228.

Natural History Societies, 395.
Natural History Terms, Dictionary of, 458.
Nebulæ, 56; great nebulæ in Orion, 258; changes in, 259; in Andromeda, 346; in Triangle, 351; in Pleiades, 448; the Crab nebulæ, 451.
Nepticulæ compared with coleophora, 1.
Nero, insurrection of the Jews in the reign of, 341.
Nerve cells, Lionel Beale on, 148.
New metal, 307.
New planet, 79th, 307; supposed, 468.
New South Wales, ichthyolites from, 348
New-year's offerings in China, 74.
Niam-niams, tribes of, 51.
Nights in Lapland, 376.
Nile, sources of the, 46.
Nile Valley, geology of the, 384.
Nitro-benzole, poisoning by, 226.
Nitrogen, diffusion of, 415.
Noctua segetum, destructive habits of larvæ, 305.
Nocturnal radiation, 142.
North Pole, phenomena near the, 373.
Nostoc pruniforme, botanic name of Ophrydium versatile, 25.
Nova Scotia, ichthyology of, 460.
Nova Zembla, bottles found at, 463.
Nutrition of coleophora, 3.
Nycthemerus melanotus (black pheasant), 196.

Oakshott Heath, botanizing at, 266.
Objects, mounting dry, 370.
Oils, photogen, 94.
Olive oil, its effect upon camphor, 19.
Omer, sacred cup filled with manna, 332.
Ophiocoma (brittle-stars), 252.
Ophia (sand-stars), 252.
Ophrydura, family of, 25.
Ophrydium versatile, 25.
Organic cells, Karsten on, 146.
Organic radicles, formation of compounds of, 387.
Ornithomyia, or bird-fly, 439.
Oswestry Field Club, 396.
Oxidation in vinegar manufacture, 380.
Oxyuris in children, 390.
Oxyuris vermicularis, 462.
Ozone, composition of, 308.

Pagan temple erected at Jerusalem, 344.
Palmipes membranaceous (bird's-foot sea-star), 253.
Paper manufactured from maize, 436.
Papilio, hermaphrodite form of, 145.
Papilio urticæ in Lapland, 376.
Parasites on the mole, 24.
Parenchyma of leaves, the food of coleophora, 1.
Partridge, the tree, 196.
Pasteur on wine making, 467.
Pasteur's researches on putrefaction, 100
Patella pellucida found at Scarborough, 85.
Patent achromatic binocular magnifier, 68.
Paxillus involutus (fungus), 279.
Pearl banks, the Tinnevelly, 418.
Pedicellaria echinata, described, 13.
Penicillium glaucum, vinegar plant, the mycellium of, 240.
Perophora, ciliary action of gills, 16.
Petroline, 88.
Phascums, or earth mosses, 173.
Phasianus colchicus (common pheasant), 72.
Philip II., silver money of, 331.
Pholas crispata, theories respecting, 87.
Phosphorescence, novel case of marine, 308.
Phosphorus an allotropic substance, 28.
Photogen oils, 88.
Photographic lenses, material for, 228.
Photography, dry processes in, 302.
Physiology, manual of popular, 302.
Pig-iron, vanadium in English, 386.
Pinguicula vulgaris, or butterwort, 400.
Pissis, M., on the Andes, 177.
Planet, new, 307; supposed new, 468.
Plants, artificial fecundation of, 306.
Plastic sulphur, a misnomer, 30.
Plateau's arithmetical problem, a new method, 439.
Pleurocarpi, an order of mosses, 43, 355.
Pliny's notion of the formation of pearls, 423.
Poisoning by nitro-benzole, 226.
Polariscope, Highley's lantern, 467.
Polariscope object, beautiful, 308.
Polygala vulgaris (common milkwort), 274.
Polynesians, ferocity of the, 83.
Polyzoa found at Llandudno, 10.
Pompeii, bread from, 226.
Popular Physiology, manual of, 302.
Porphyries, formation of, 410.
Portraits, new miniature, 292.
Pouk Hill, basalt of, 98.
Pseudomorphism, 407.
Ptarmigan, moulting of the, 377.
Pterocles, term proposed for sand-grouse, 198.
Pterygoti, collection of, 230.
Ptolemy Lagus, Judæa possessed by, 333.
Ptychodus, teeth of, 229.
Puffins at Ailsa Craig, 116.
Putrefaction caused by oxygen, 379; Pasteur's researches on, 100.
Putrid fermentations, epochs in, 379.

QUICKIOCK, natural history of, 375.

RAIN, solid matter in, 228.
Ralph Fitch, the London pearl merchant, 418.
Rangoon tar, 89.
Reason and instinct, 211.
Recreations, arithmetical, 353.
RESPIRATION of coleophora, 3; of ruminants, 147; of slug, 105.
Reversible compressorium, a new, 370.
Rhizopods, the amœban, 466; Mr. H. J. Carter on, 307.
Rhodes, earthquakes at, 227.
Robertson's, Mr., preparation of cossus, 3.
Rocks, principal varieties of, 409.
Rocky Mountains, precipices in the, 310.
Ross's new compressorium, 227.
Royal Society, 463.
ROYAL SOCIETY OF LITERATURE.—Ancient knowledge of African lakes, 464.
Ruined abbeys and castles of Great Britain and Ireland, 461.
Ruminants, respiration of, 147.

SABELLA, tubes of, 11.
Sagina procumbens, 269.
Salix prostrata, 276.
Samaritans, faith of the, 333.
Sandal-wood and its commercial importance, 73.
Sander's-wood, ancient name for sandal-wood, 77.
Sandstone, metamorphosed, 412.
Sandwich Islands, sandal-wood in the, 78.
Sand-grouse, the new British, 197.
Santalum album, seed of, 74.
Scales of the eel, how to obtain, 428.
Scarborough, the zoologist at, 84.
Scenery of the Colorado River, 310.
Schistocarpi, an order of mosses, 43.
Scientific researches and medical science, 303.
Scutellaria minor, 274.
Sea-weed a constituent of coal, 317.
Seismographic map of the world, 360.
Seismology, 299.

Siberian jay in Lapland, 375.
Silurian system, fossils, 398.
Simon Maccabæus, coins of the reign of, 328.
Sirius, distance of, 467.
Skin of the mole, peculiarities of, 21.
Skins, method of preserving, 24.
Slate, metamorphosed, 412.
Sledging, 374.
Slug, lungs, heart, and blood-vessels of the, 105.
Smoke-rings of Vesuvius, 326.
Snout of mole, mobility of the, 21.
Snow bunting in Lapland, 376.
Snowy mountain peaks in Tropical Africa, 385.
SOCIAL SCIENCE CONGRESS.—Alleged elevation of the coast line of the Lothians, 305.
Solaster papposa (common sun-star), 251.
Solid bodies, putrefaction of, 103.
Solitude, 115.
Soorum, an enemy to oysters, 420.
Soudley, quarries of, 398.
Sources of the Nile, 46.
Species, change of habit in, 388.
Spectral analysis, Volpicelli on, 308.
Spectroscope, the Gassiot, 67.
Speke's, Captain, discoveries, 46.
Spergula saginoides, 269.
Spleen, caused by infusoria, 177.
Spontaneous generation controversy, 466.
Spores, differences between moss and fern, 43.
Spouting wells of Canada, 89.
STARS, clusters of, and nebulæ, 56; cluster in Perseus, 256, 352; double, in Cassiopeæ and Ophiuchi, 193; falling, 156; method of observing variable, 303.
Star-fishes, the British, 251.
Steam engines, loss of heat in, 417.
Stenopteryx, or swallow-fly, 439.
Storm of October 30th, 1863, 386; of 2nd and 3rd December, 1863, 468.
Strata, faults and the dip of, 321; of the globe, concussions in the, 301.
Sugar from serpents' skins, 226.
Sula alba (solan goose), 118.
Sulphur, an allotropic substance, 28.
Sulphuric acid in photogen oils, 93.
Summer near the North Pole, 376.
Sunlight illumination for the microscope, 307.

XUM

Sun spots, absence of, 67; Kirchhoff on, 467.
Surrey, flora of, 458.
Swedish bear, 376.
Syenites, formation of, 410.
Syncladei, an order of mosses, 43.
Synonymes, desk-book of English, 459.
Synthesis, 65.
Syria, the hyrax of, 134.
Syrrhaptes paradoxus (sand grouse), 197.

TABLE-STAND for astronomical telescopes, new, 282.
Tænia solium in man, 390.
Tanganyika, lake, 48.
Tan-leong, Chinese name for sandal-wood, 77.
Tapes pullastra, theories regarding, 87.
Tape-worms in condemned criminals, 390.
Tavernier, the travelling jeweller, 418.
Telescope, the achromatic, 452.
Telescopes, new table-stand for, 282.
Temperature below the earth's surface, 223.
Tenebroscope, 225.
Tertiary shells of Jamaica, 65.
Tetraphis pellucida, pellucid four-toothed moss, 140.
Thallium, poisonous effects of, 226.
Thallium, is it a poison? 304.
Thistles, contractile filaments of, 146.
Thrushes of Ailsa Craig, 115.
Thunderbolts, 159.
Thunderstorms and the moon, 306.
Tidal "bore" in Gulf of California, 310.
Tinnevelly pearl banks, the, 418.
Tischeriæ compared with coleophora, 1.
Titus, Jewish coins issued by, 341.
Tolmene in photogenic oils, 91.
Tongue, an artificial, 466.
Tragopans, remarks upon the horned, 69.
Trichinæ in sausages and hams, 390.
Trochus helicinus found at Scarborough, 87.
Turtonia minuta, 85.
Tuticorin, head quarters of the Ceylon pearl fishery, 419.
Typhoid fever, bacteriums and, 467.
Tyre, taking of, 330.

ULEX nanus, the dwarf furze, 269.
Unicellular plants and animals, 42.
Ural owl in Lapland, 375.
Urasters (star-fish), 251.
Uria troile (the guillemot), 119.
Uric acids, crystallizations of, 97.
Utamania torda (razorbill), 119.
Utilization of the maize plant, 436.

VACCINIUM vitis idæa (cranberry) food for coleophora, 5.
Vanadic acid, 431.
Vanadium, the metal, 431; in English pig-iron, 386.
Vasculum for botanizing described, 281.
Vegetable matter in coal, 317.
Velocity of shooting stars, 386.
Veronica, species of, 277.
Vesuvius, smoke-rings of, 326.
Vibrio family, notes on the, 378.
Vibrio, species of, 100.
Vibrions, classification of, 238.
Victoria Nyanza, African lake, 46.
Vinegar manufacture, oxydation in, 380.
Vinegar plant, minute structure of the, 238.
Vinous fermentation, 246.
Viola palustris, 277.
Vipers of France, 388.
Vitality, circulation necessary to, 411.
Volpicelli on spectral analysis, 308.
Vorticellina group, 25.

WALLICH, Dr., on the amœbæ, 388.
Wars of Wapsburg, 459.
WATER action on rocks, 315; its effects upon camphor, 18; system of Africa, 52; uses of Dead Sea, 307; utilization of natural falls, 223; in coal mines, 321; dissolving power of, 408; the earth's blood, 411.
Waterfalls, our English, 460.
Watery cists or hydatids, 389.
Weddos, or Widdos of Ceylon, 464.
Wenlock Edge, 401.
West Brighton Microscopical Club, 462.
